

ADVANCED COLOUR TOOLS

To match its superb colour strike rate, the Paraglaze range is backed by a suite of advanced colour tools. This includes the industry leading PAINtMANAGER® XI colour software which is a proven tool for boosting paint shop productivity thanks to its fast colour formulation retrieval and mixing. Its massive, up-to-the-minute colour database features decades of colour formulation history covering vehicles from all major markets.

PaintManager® XI

RapidMatch™ GO

Further slashing colour matching time is the high-tech RAPIDMATCH® GO spectrophotometer. With advanced optics it measures a painted surface from an industry leading five angles in order to get a precise colour reading. The RapidMatch GO then seamlessly transfers data to PaintManager XI, via Wi-Fi or the docking station, where it can quickly display the closest possible matching colour formulation.

MONOMETALLIC DIGITAL COLOUR CARD

A digital representation of Protec's range of 32 single layer metallic colours

Protec has carefully managed the colours being presented in the images below to ensure their accuracy to the true paint colour. Colour reproduction can vary when viewing colours on your screen. Colours which display on the screen and printed colours may not match the paints actual colour.

AUTOGUARD LIFETIME WARRANTY

For additional peace-of-mind, the Paraglaze range also qualifies for the Protec Lifetime Warranty Paint Protection Scheme (conditions apply). Contact your local Protec representative for further information regarding the terms and conditions of Autoguard Lifetime warranty.

THE #1 CHOICE FOR QUALITY, PERFORMANCE AND PROFITABILITY

Locally developed using the latest global technology, the Paraglaze range is the cost-effective choice for modern bodyshops that refuse to compromise on quality and performance. Versatile primers, high opacity basecoats and durable, glossy clearcoats are complemented by a variety of flexible coatings options which provide effective solutions for a wide range of substrates and coatings applications. Manufactured in Australia to suit local refinish users, Paraglaze contains all the high-tech ingredients to match the latest vehicle colours and produce a premium finish, while enhancing paint shop productivity.

Why Paraglaze?

- World-class technologies in primers, tinters and clearcoats
- Australian developed and manufactured to suit local conditions
- Excellent colour matching, coverage and control
- Complete package of high-productivity colour tools
- No fuss mixing and application
- Versatile, cost-effective options, including Paraglaze CT and Paraglaze 64
- Exceptional durability
- Lifetime warranty
- Comprehensive Protec backup support and training

Tinters

Precisely controlled, high-opacity Paraglaze tinter formulations make colour matching easier and ensure coverage with a minimum number of coats. Features include excellent control of metallic and fast flash-off and drying times.

Primers

Paraglaze primers are all about versatility and performance across virtually any application. Features include the option to use a productive Wet-On-Wet mode, tint-ability to assist with quick coverage, excellent film-build, surface levelling and gloss hold out, as well as easy sanding.

MaxiGLAZE

Clearcoats

From one panel to a full respray, the Paraglaze clearcoat range literally adds the perfect finishing touch for modern vehicles. Along with ease of application, first-class flow and levelling, fast curing and excellent gloss, these advanced formulations incorporate outstanding UV protection for long term durability. MAXIGLAZE® Clearcoat is a perfect example. Locally developed using the latest 'high solid' global resin technology, it flows smoothly and leaves a superior, crisp, clear finish straight-off-the-gun.

CT

PARAGLAZE CT - THE DEDICATED COMMERCIAL TRANSPORT COATINGS SOLUTION

By utilising the excellent Paraglaze tinter system, Paraglaze 64 offers a top quality, gloss-only range that provides a cost-effective solution for applications other than the professional refinish sector. Along with superior UV resistance to cope with local conditions, Paraglaze 64 provides users with excellent speed, gloss and durability, as well as a wide choice of solid colours and single layer metallics.

Unique paint system properties are required in order to efficiently tackle Commercial Transport (CT) vehicles which is why Protec created Paraglaze CT. Developed and made locally, it combines the proven Paraglaze tinter system with specialised primer and clearcoat technologies tuned to the specific requirements of CT users. There is even a 'Flexible Additive' that makes Paraglaze CT ideal for 'curtain-sider' trailers, as well as PVC banners and signs. From trucks and buses to large trailers and tankers, Paraglaze CT delivers high productivity solutions to get the job done quickly and cost effectively.

Why Paraglaze CT:

- Productivity and ease of use
- Primers to suit CT substrates
- Excellent durability
- Comprehensive colour range to match local fleets
- Flex Additive for PVC curtains
- State-of-the-art colour tools
- Eligible for lifetime warranty
- Protec back-up support and training

ONECHOICE® UV8080 - PRIMING AT THE SPEED OF LIGHT

Another key advantage of using the Paraglaze system is that it works perfectly with innovative ancillary products, such as OneChoice UV8080. Featuring no-waste aerosol efficiency, no flash-off, remarkable film builds and a three-minute cure under an approved UV lamp, this extraordinary product lets you process smaller repair jobs up to 75% faster!

Why UV8080?

- Three minute cure
- No flash-off
- Amazing film-build
- Aerosol convenience
